Summary

Full-stack engineer with 7+ years shipping web and mobile products. Proven track record leading backend migrations (Laravel → Go), building automated CI/CD pipelines, and delivering production-grade applications across the stack. Self-directed — I take ownership end-to-end: from architecture and implementation to deployment and monitoring.

Experience

Software Engineer · **Vivere** (2023 – Present)

- Leading a Laravel-to-Go backend migration for published web applications — cut response latency by ~40% and simplified deployment with Dockerized microservices.
- Built CI/CD pipelines from scratch (Docker Compose + Traefik, GitHub Actions) for automated testing, build, and release.
- Instrumented analytics and performance monitoring across apps and servers — driving data-informed product decisions.

Tech: Go · PostgreSQL · Docker · CI/CD · Prometheus · Grafana

Software Engineer · **Brandztory** (2022 – 2023)

- Architected a production-grade project boilerplate (React + Next.js + TypeScript) adopted across the engineering team — reduced new project spin-up time from weeks to days.
- Rebuilt the company website with Next.js and TypeScript, achieving measurable Lighthouse gains over the legacy PHP stack.
- Maintained and shipped features across published web and Android applications.

Tech: React · Next.js · TypeScript · Tailwind CSS · Kotlin

Front End Developer · **WIT Indonesia** (2019 – 2022)

- Delivered 6+ client projects concurrently — internal tools, marketing sites, and dashboards — on time and to spec.
- Established the frontend department's development standards and a shared component library used across all projects.
- Collaborated directly with business analysts, UI/UX designers, and DevOps in cross-functional teams.

Tech: Vue.js · Nuxt.js · JavaScript · PHP

Mobile Developer · Digital Asia Indonesia (2018 – 2019)

- Built and shipped web and mobile applications from concept to production — full deployment lifecycle including Play Store submission.
- Worked closely with UI/UX and engineering to deliver polished, user-facing products.

Tech: Android · Kotlin · Java

Intern Fullstack Developer · Smartek Sistem Indonesia (2017 – 2018)

- Mentored junior interns in full-stack web development — conducted code reviews and pair programming sessions.
- Delivered web and mobile applications end-to-end across the stack.
- Conducted on-site user training and turned direct feedback into product improvements.
